Two New Faculty Openings in the ITLS Department at Utah State

12/03/2018

Faculty in the ITLS Department work in the Education Building

Logan, UT – The Instructional Technology and Learning Sciences Department at Utah State University has opened up two new faculty positions. Details are below.

The Emma Eccles Jones College of Education and Human Services invites applicants for two tenure-track, nine-month academic year positions at the Assistant or Associate Professor level to join the internationally recognized Department of Instructional Technology and Learning Sciences (ITLS). Applications are currently being accepted for one position in Learning Sciences and one position in Instructional Technology. All relevant specialization areas are welcome. Individuals who bring scholarly and applied expertise in the areas of language learning, literacy, design thinking, user interface/user experience (UI/UX), games for learning, and instructional design are especially encouraged to apply. Successful candidates will, by the time of appointment, have (1) a doctorate in Learning Sciences, Instructional Technology, Information Sciences, Educational Psychology, or other related fields and (2) have demonstrated excellence or the potential for future excellence in research and teaching. The anticipated start date is August 1, 2019.

The successful candidate is expected to develop a cutting-edge research program, supervise graduate students, and teach graduate and undergraduate courses delivered in face-to-face, broadcast, and online formats. Candidates will have expertise in relevant theories, technologies, or methods and be prepared to teach existing course offerings in the department, especially in the M.A. and undergraduate programs, and propose innovative new courses that will serve the needs of the student population. Successful candidates will be receptive to opportunities for collaboration within the department, college, or university. Candidates at the Associate level will have an established record of productivity and effectiveness that merits tenure at Utah State University, a Carnegie Doctoral land-grant university of higher research activity.

Responsibilities

- Participate in research, publication, grant writing, and other scholarly activities.
- Teach graduate courses and undergraduate courses in the areas of learning technologies and/or instructional design
- Serve on and chair graduate student committees and advise graduate students.
- Provide service to the department, college, university, profession, and community.

Apply
